“Horizontal Worship”

Choir Members and Congregation
Witnessing To One Another

Sometimes in our Church, our choir members sing not recognizing the needs of other choir members and the brothers and sisters in the congregation. Paul says in Ephesians 5:19, that we are to address one another in Psalms, Hymns, and Spiritual songs. Singing and making melodies to the Lord with our hearts (minds).

When we sing our songs there should be a Horizontal Element that will build up and witness to each choir member and the brothers and sisters in the congregation. Reminding, affirming and encouraging each other. This is called the edification of the church. Prayfully God will be glorified through our ministering to one another.
